Supplementary Figure 1. Position of siRNAs IN cDNA sequences from hpv16 e6 and e7 oncogenes. siRNA sequences (capital case bolded) and relative position in cDNA from HPV16 E6 (a) and E7 (b) oncogenes used in this study are shown.

The siRNA sequences were designed using the software

http://www.ambion.com/techlib/misc/siRNA_finder.html.

The Genebank access number to HPV16 E6 and E7 cDNA oncogenes is: 29468132/AF402678.1.
